

For more than 25 years, Bellwyck has been a true partner in developing smarter solutions for the pharmaceutical industry — from clinical trial to commercialization. Our consulting services start with a dedicated project management team led by a single point of contact throughout your project.

Our team strives to provide exceptional service as we work side-by-side with your team to understand your specific needs. From here, we'll design a Package Smart™ Solution that will not only support you now but well into the future as your project evolves or your needs advance.

From quote to completion, we provide:

- Support at any stage of your trial (Phase I – IV), including Investigator Initiated Trials
- Clinical packaging for all dosage forms and study designs
- Strategy and planning services, including protocol interpretation and consultation
- Package design
- Controlled room temperature, refrigerated, and frozen CTM storage
- Customized global distribution and support
- QP services
- Customized logistics protocol management
- Procurement of components, comparators and rescue meds
- Translation services and regulatory certification
- Returns, reconciliation and destruction services

Compliant with regulatory

We also stay on top of industry best practices, helping our customers:

- Remain compliant with regulatory issues (in multiple jurisdictions)
- Utilize cost-efficient strategies which facilitate patient and protocol compliance
- Launch clinical studies on time, every time with a 99.9% delivery rate
